## INTRODUCTORY

---

No American College has been longer in need of a catalogue of its former students than William and Mary.

It is regretted that this book cannot list the names of all Alumni since 1693, and it is hoped that a future catalogue will do so.

Reasonable care has been taken to make the catalogue complete and accurate for its period.

3-1-76R

## EXPLANATORY

---

1. Contrary to the usual custom of classifying Alumni by their years of graduation, this catalogue for good reasons classifies them according to their last year of enrollment in the college.

Until the years subsequent to the Great War, those leaving in a given year are listed in three groups: "Present Addresses Known," "Dead" and "Present Addresses Unknown." After each name in every list, the years of his attendance, and the place from which he first registered are given. The second address, when given, is the present address.

2. Meager information about such a large percentage of those reported "Dead" caused the abandonment of the plan to list their occupations, and the dates and places of their deaths. Future catalogues should do this.

3. Concerning those in the third group, it should be stated that much effort was given during the past four years to securing information about them, and that all with uncertain addresses have been excluded from the first group.

4. Full names have been given when possible, except in the index and in the geographical distribution. In the period 1865-1881 so few full names could be given that it was considered desirable to list in parentheses the parent or guardian of each student.

5. In addresses, "Virginia" is consistently omitted for economy in composition.

6. Addresses of Army and Navy officers are too changeable to be given. First-class mail will reach them more directly, when addressed to Washington, D. C., in care of the Adjutant-General, U. S. A., or the Bureau of Navigation, U. S. N., as the case may be.

7. ‡ Found only in the period 1865-1881, indicates that the student appears to have been enrolled only in the Grammar School.

8. † Indicates those known to have served actively in the Great War. Many more Alumni doubtless served, but information is lacking. Recent Alumni who were veterans before entering the college—their number is very large—have not been indicated. A history of William and Mary's contribution to the Great War should be written, and future catalogues should list the rank and period of service of those who served.

9. \* Paid members of the Alumni Association as of October 1, 1924.

10. § Found only in the very latest years, and signifying that the student completed degree requirements in summer sessions, or in extension courses, or in both, without ever having been enrolled in a regular session. Except for the small number, thus indicated, who have graduated, no attempt has been made to include with the students of the regular sessions that large army of men and women who have in recent years studied in the summer sessions and extension courses only of the college.

11. In the years of the William and Mary Academy, 1912-17, this catalogue makes no distinction between academy students and college students.

12. The titled graduates of the college since 1888, and the members of Phi Beta Kappa, Alpha Chapter of Virginia, are separately listed apart from the classifications by years.

Recipients of honorary degrees at the hands of the college, and of honorary keys at the hands of the William and Mary Chapter of Phi Beta Kappa have not been included.

## HORTATORY

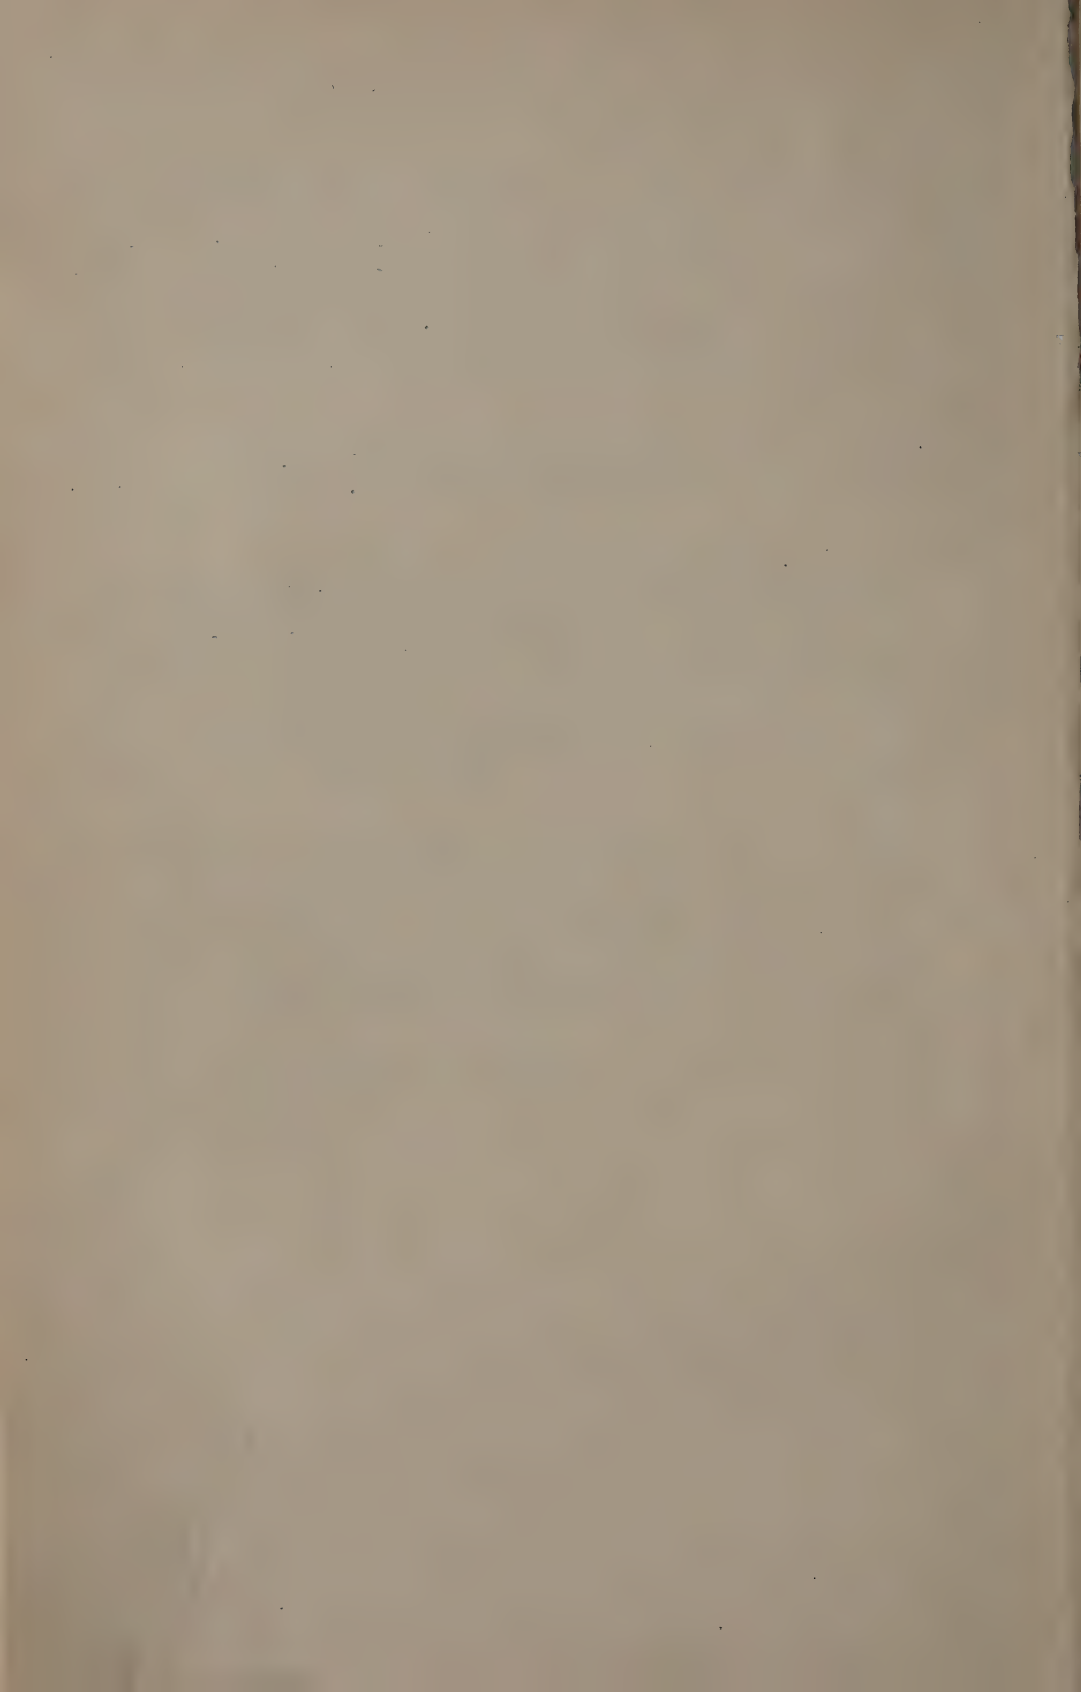

---

1. Judge this book charitably, as an initial effort, and with a realizing sense of the magnitude of the task, and of the human impossibility of freeing it from an inevitable percentage of error.

2. Bear in mind that the more recent the Alumnus or Alumna the more subject to frequent changes their addresses are.

3. Let every Alumnus and Alumna co-operate in making possible a complete and more accurate Catalogue four or five years hence. Do this by writing without delay the Alumni Secretary, listing all errors noted, and giving information which should be in the Alumni Office concerning those listed in the third group, and "italicized" in the geographical distribution.

## 1882-1888

During the six sessions between June, 1881, and September, 1888, the fortunes of the College were very low. In those years, President Ewell, sometimes with assistants and sometimes as the sole teacher, kept the College in partial operation. The only students were young men of Williamsburg and vicinity. No catalogues were published, and if any records were kept, they have since disappeared. While the names of some students of this period could be published, it is not considered advisable to do so until more authentic information can be had.
